DETAILED ACTION

Reasons for Allowance

The following is an examiner's statement of reasons for allowance:

Claims 8-10 are allowed. Mizuuchi and Bischel teach the optical waveguide device with a domain inverted structure but not a specific range for a Bragg reflection wavelength that harmonizes with a phase matching wavelength in the structure. With reference to claim 10, U.S. PGPub 2001/0048705 to Kitaoka et al. teaches a wavelength-variable semiconductor laser having a DBR region 111 and a wavelength converting device 116 comprising a domain-inverted region 114, but the DBR region 111 is not part of the domain inverted region 114 as required by the claim. As there are no teachings or suggestions in the prior art to determine the value of the Bragg reflection wavelength or use an alternative structure as disclosed, it is the examiner's opinion that the prior art of record, taken alone or in combination, fails to disclose or render obvious the disclosed invention, in combination with the rest of the limitations of the base claim.

Claims 2-7 and 11-28 are allowed as dependent claims of allowed claims.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
